

MD SABBIR HASSAN

Sylhet, Bangladesh ♦ +8801615118932 [✉](#) ♦ _sabbAirhasanshrabon@gmail.com [✉](#) ♦ [GitHub](#) [✉](#)

Education:

B.Sc. in Statistics

Nov 2024 – Present

Shahjalal University of Science and Technology, Sylhet, Bangladesh.

Skills and Interests:

Programming Languages	C, C++, Python, JavaScript, HTML, CSS
Machine Learning & AI	Model Fitting, Supervised/Unsupervised Learning.
Robotics & Embedded Systems	Microcontrollers: Arduino Uno, ESP32 Sensors & Actuators: IR Sensors, Motor Drivers, PWM Control, sonar sensor, Autonomous Robotics: Line Following Robot (LFR) Development, Obstacle Avoidance Systems
APIs & Automation	Facebook Graph API, Instagram API, Content Automation.
Tools & DevOps	Git, GitHub, Jupyter Notebook, Google Colab, VS code, Android Studio, Cursor, Windsurf, Antigravity, OpenCode, Xampp, MySQL, Supabase, Vercel, Render, Netlify, Railway
Interests	Statistical Machine Learning, Full-Stack System Design, Autonomous Execution Frameworks. Probabilistic Robotics

Projects:

Flowo(Agentic Life Optimization Framework) [✉](#)

- Engineered an AI-driven personal optimization framework in Python designed to autonomously manage, schedule, and execute daily productivity workflows.
- Implemented agentic decision-making logic to systematically deconstruct long-term goals into milestone-based executable tasks.

Titanic TensorFlow Classification [✉](#)

- Implemented a structured machine learning pipeline using TensorFlow Decision Trees to execute predictive classification on tabular data.

EDA(Exploratory Data Analysis) [✉](#)

- Here i tried to Analyze raw datasets to discover patterns, identify anomalies, check assumptions, and handle missing data or outliers using descriptive statistics and graphical representations.

Auto_post (Content Automation System)

- Engineered a TypeScript-based automation application designed to programmatically generate media content.
- Integrated Facebook Graph API and Instagram API to handle automated cross-posting, payload delivery, and token authentication.

Cognitive-Ai

- Developed Python-based scripts dedicated to exploring cognitive computing concepts and automated AI workflow executions.

MessMate

- Built a full application system tailored to managing, calculating, and tracking utility logs and dining accounts for shared living setups.

System-arise

- I tried to build a self development system based on the theme **Solo Leveling**. I used **React** framework and **Vite** as the build tool/development server

Organization:

RoboSUST- a robotics based club at SUST.

2025-present

SUDS- a debating club at SUST

2025-present

Extra Curricular Activities

• Departmental Basketball Player

- **Creative Writing (Poetry):** Write and compose original poetry, focusing on creative expression and structural storytelling. Have a facebook page dedicated for this.
